## **DETAILED ACTION**

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a) because they fail to show hinge element 206 as described at page 13, line 21 of the instant application, as it pertains to Figure 20. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7-9 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The following phrase(s) lack clear antecedent basis within the claim(s), i.e., either the particularly recited passage fails to be properly introduced prior to its appearance at that point in the claim or the structure recited in the passage is not an inherent part of or component of the previously recited structure:

- (i) Claim 7 (line 2), "the base."
- (ii) Claim 8 (line 2), "the base."
- (iii) Claim 9 (line 2), "the base."

Art Unit: 2652

(iv) Claim 15 (line 2), "the stack retainer."

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Kurosu (US 5,123,005).

As per claim 1, discloses a memory storage disk handling system, comprising: a housing (2); an elevator pin (47) mounted on the housing (2) for lifting disks (20); a servo motor (motor (39) which inherently includes a servo control in order to turn motor on at a prescribed time, and turn it off at a prescribed time) attached to the housing (2); and a linkage assembly (including (45, 49, 50) attached between the servo motor (39) and the elevator pin (47).

***Allowable Subject Matter***

Claims 10-14 and 16-20 are allowed.

Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 7-9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Art Unit: 2652

Claim 15 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

*Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
